

HOME
WATER FILTRATION

Experience the gentle care of
PURE, SOFT WATER
with 3M SFT Water Softeners.

Water softeners that care
about your family as much as you do!

Hard Water Woes

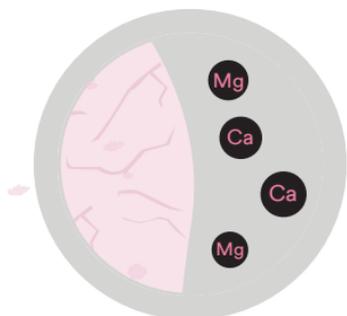

How it harms you

Clogs your shiny
fixtures and pipes
with unsightly
salt deposits

Roughens your
hair, making it
unmanageable
and frizzy, leading
to hair fall

Leaves your skin
dry and flaky, and
causes irritation

3M™ Fully Automatic Water Softeners

What sets us apart

1. Install and Forget

With 3M Water Softeners, all YOU need to do is plug it in! With the auto-regeneration feature, our water softeners bring you maximum quality, with minimum intervention.

2. Complete Control

3M Water Softeners give you complete control with the NSF-listed, globally best-in-class, High Quality Control Valve (operation based on time and flow rate along with a built-in bypass valve).

3. Reliable Resin

3M Water Softeners use high-efficiency and high-performance food grade resin. A built-in strainer prevents any resin leakage, eliminating the frequent need to top up the resin.

4. Inspiring Design

The arc barrel body design is both aesthetic and practical. 3M Water Softeners are equipped with a damping cover for ease of access and a premium user experience. With effective space utilisation, by integrating the resin tank and brine tank in one unit, they are a perfect fit for the modern home.

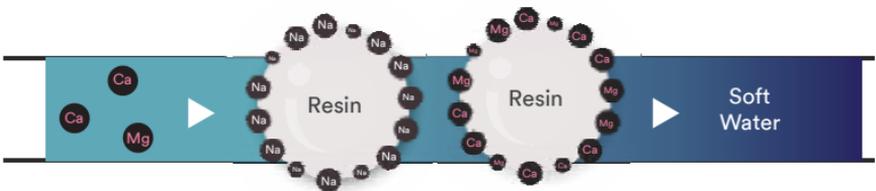

Ion Exchange Technology

How it works for you

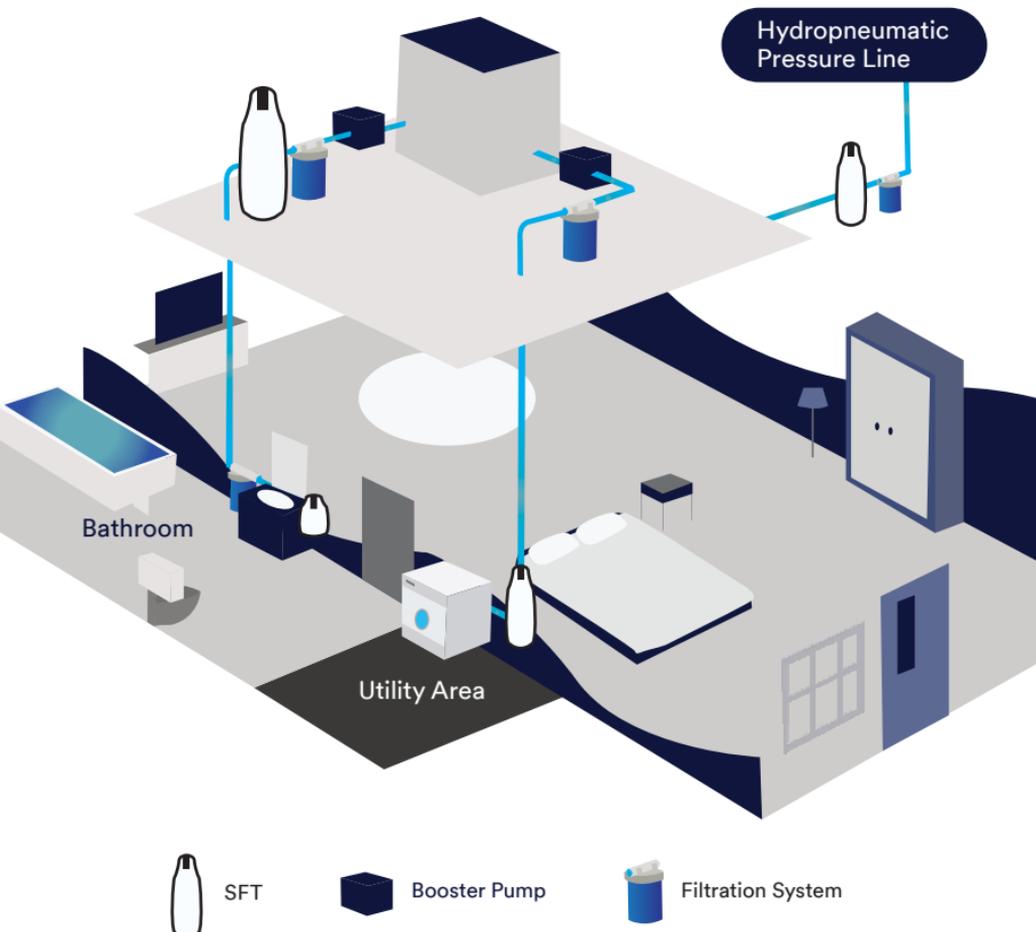

The high-quality, long-life resin used in 3M's range of fully automatic water softeners, ensure that you have soft water, throughout your house. The resin removes Calcium and Magnesium ions from hard water and softens it using ion-exchange technology.

The result?

Soft water for your entire home, with minimal maintenance!

One 3M Fully Automatic Water Softener provides your entire house with soft water. It can be installed in any of the locations illustrated below.
